

Web Sentinel

Web-based Flight-Following, Messaging, Data Reporting

Display both live and historic flight data from your SkyNode® equipped fleet using any map type and data table. Receive email alerts of events such as take-offs and landings, including customized flight profiles. Remotely control the operating parameters of each SkyNode® satcom transceiver. Add as many viewers, such as clients and employees, as you like.

Accessible Anywhere, Anytime

Latitude Web Sentinel subscription-based data management service offers a reliable and affordable solution for processing geo-positioning and telematics data, collected and distributed

by SkyNode and GeoNode devices operating on-board aircraft, overland vehicles and marine craft.

Web Sentinel

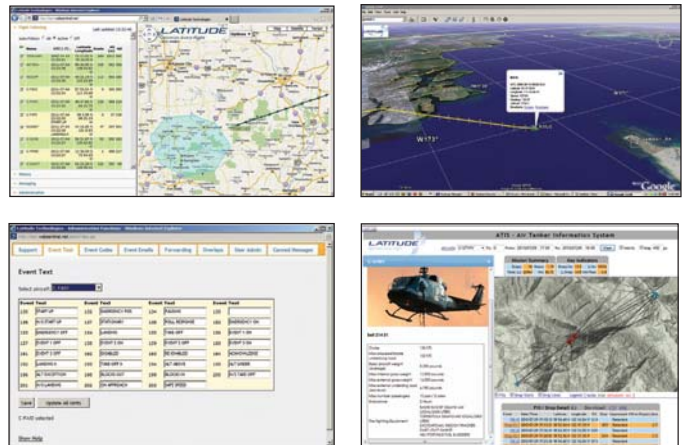

Web-based Flight-Following, Messaging, Data Reporting

Benefits

- » Better manage aircraft location and operational status
- » Better protect operator and asset with event-triggered or automated alerts
- » Improve field operator efficiency
- » Improve maintenance coordination
- » Track mission ETE, and collect mission time and distance usage
- » Download the data into your business reporting/invoice programs
- » Supports concurrent web-users
- » Exceeds US Forestry AFF.GOV reporting requirements
- » Integration to your proprietary ERP system
- » Secure data transfer

Web Sentinel supports:

Internet Explorer, FireFox, Safari or Chrome.

Screen shot examples of live transmitted events.
